PRODUCT MANAGER (Belgium, Liège)

SCOPE

The Product Manager will work on the Sports OB, as part of the existing team.

JOB DESCRIPTION

As part of the "Sports OB" team, the product manager represents the customer and users. He manages the product roadmap: defining features, defining their priority relationship with the Product Development etc.

The "Sports OB" team delivers products used in a live environment to do instant replay of the key actions of a Sport event. These products also enable the production of highlight packages based on multicamera content recorded during the event.

As Product Manager, he synthesizes the market demands into a coherent set of products, generates their specifications and follows-up their implementation with the Product Development and Test teams, sometimes in an agile environment.

He participates in the design of Product lines. This ranges from proposing improvement to the existing applications, writing specifications for new software modules and applications, or managing the technical relationship with technology partners. This means understanding the technology trends, the competitive field, and the user requirements to deliver coherent product specifications.

As a member of the Product Team, key person to receive and provide information about product evolution and operation, and therefore communicate with other departments of the company such as Sales, Operations, Marketing, R&D, Q&A. This position includes short trips worldwide on a regular basis, to visit customers and attend television/sport events and trade shows.

MAIN RESPONSIBILITIES

- Gather market information from sources inside and outside EVS
- Identify customers' requirements
- Define new product specifications or improvements with a acute sense of balance between market opportunities and development costs
- Manage the product roadmap with the Market Solution Manager
- Follow up the development of the product with Product Develoment team
- Guide product trade-off decisions, being aware of the potential effects of technical decisions on the roadmap of the product
- Take part in product qualification and validation with the QA Department
- $\bullet \ \mathsf{Manage} \ \mathsf{the} \ \mathsf{release} \ \mathsf{process} \ \mathsf{with} \ \mathsf{the} \ \mathsf{other} \ \mathsf{departments} \\ : \mathsf{Sales}, \ \mathsf{Marketing}, \ \mathsf{Technical} \ \mathsf{Support} \\$
- \bullet Make sure product documentation is produced and held up to date
- Coordinate internal trainings and certification programs with the Training Department
- Support of the Sales and Pre-Sales teams on project where specific product insight or prospective is required
- Keep an eye on competitors' products
